IMPORTANT INFORMATION

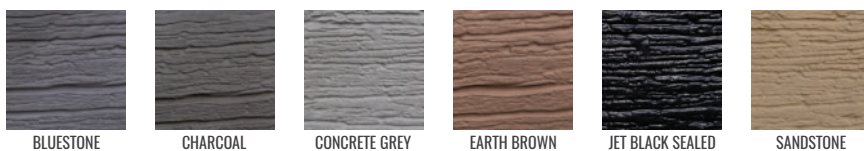

- The above information is based on our products generic engineering and is not site specific
- Walls over 600mm high may require engineering from a Certified Engineer
- It is important to check council requirements and/or approvals required prior to commencing your project
- Post embedment minimum = Height of the wall + 100mm under posts

RETAIN EASE COLOUR SELECTION

All RetainEase Structural Concrete sleepers are available in a range of colours listed below. RetainEase sleepers are coloured right throughout the concrete during the manufacture process.

Please note the colour swatches are a good indicator of colour however colours may vary slightly during the manufacturing and curing process.

We recommend looking at a display wall near you for a more accurate colour selection prior to your purchase.

RetainEase Structural Concrete Retaining Wall systems are designed to be built with Hot Dipped Galvanized Steel Posts. RetainEase is a stockist of Australian Hot Dipped Galvanized Steel beams available in various lengths and sizes to suit most retaining wall projects. We also have Timber and Colorbond fence brackets so you can attach your fence directly above your retaining wall.
